

15-19 October 2007 Perth, Western Australia

Topics include:

- spin injection and spin-dependent tunneling;
- magnetization dynamics and exchange bias;
- magnetic recording media and patterned elements;
- nanostructures and multiferroic materials;
- biomedical applications.

MMI 2007

6th International Symposium
on Metallic Multilayers

<http://www.mm107.uwa.edu.au>
mm1@cyllene.uwa.edu.au

Support is available for students and early career researchers.

Topical Overviews

William Butler
(CMIT, University of Alabama, USA)

Peter Pirschel
(Lawrence Berkeley National Laboratory, USA)

Andrei Kirilukh
(Radboud University, Netherlands)

Yoshichika Ozari
(Oakland University, USA)

Hartmut Zabel
(Ruhr-Universität, Germany)

Plenary Speakers

Mart Blamire
(University of Cambridge, UK)

Berhard Hillebrand
(Technische Universität
Karlsruhe, Germany)

Jürgen Kirschner
(Max-Planck-Institut für
Mikrostrukturphysik, Germany)

Roberto Muniz
(Universidade Federal Fluminense,
Brazil)

Yoshishige Suzuki
(Osaka University,
Japan)

IEEE

Australian Government

Australian Research Council

Nanotechnology Network
